SOLAR PUMPING SYSTEM

INTRODUCTION

Nowdays Solar pumping system is becoming more and more popular, it is being applied to daily use (underground water), agriculture irrigation, forestry irrigation, desert control, pasture animal husbandry, water supply for islands, wastewater treatment engineering, and so on. In recent years, with the promotion of the utilization of non conventional energy resources, solar pumping systems are being used more and more in municipal engineering, city center squares, parks, tourist sites, resorts and hotels, the landscapes and fountain systems in the residential areas. This system is composed of a solar array, a pump and a pump controller. Based on the design philosophy that it is better to store water than electricity, there is no energy storing device such as battery in the system.

STRUCTURE OF SOLAR PUMPING SYSTEM

The solar array, an aggregation of many solar modules connected in series and/ or parallel. This array absorbs radiation from sunlight and converts it into electrical energy thus help in providing dynamical water as a whole system. The pump controller controls and adjusts the system operation, according to the variation of intensity of sunlight to realize the maximum power point tracking (MPPT). The pump is able to draw water from the deep wells or rivers and lakes to pour into the storage tank or reservoir, or directly connect to the irrigation system, fountain system, etc. According to the actual system demand and installation conditions, different types of pump such as centrifugal pump, axial flow pump, mixed-flow pump or deep-well pump may be used.

SOLAR PUMPING SYSTEM

APPLICATIONS

- Ground water lowering
- Irrigation systems
- Industrial Application
- Drip irrigation & sprinkler
- Tank / Cistern filling
- Wildlife refuge
- Rural water supply for ranches, cabins, and cottages
- Fountains

FEATURES

- High flow system for faster tank filling and significant water output.
- Proven motor and pump technology for long-term reliability
- Pumpset can start at low radiations.
- Clean and pollution free energy, Eco-friendly.
- Ideal for remote areas, where electricity is not available or availability is capital intensive.
- Suitable for day time irrigation, Continuous supply for 6-8 hours in a day.
- MPPT – Max Power Point Tracking for maximizing efficiency of input power
- Soft start feature prevents water hammer and increases system life & easy to operate.
- Simple installation and maintenance free.
- MNRE approved.

ALL-IN-ONE PACKAGE

The Solar controller is used as a solution for specific pumping requirements of the solar pumping system. Using Shakti components, our technical expertise in groundwater pumping, and innovative thinking based on global market inputs, we have developed a rugged, high-output system which tackles the challenges of remote and harsh environments. No other system delivers the features, benefits, and reliability of solar controller in just one package!

THE SOLAR WATER PUMPING SYSTEM INCLUDES

- Shakti High Efficient Submersible motor
- Shakti Submersible pump
- Solar Panel and its mounting structure
- Solar controller
- Cable
- Pipes
- Variety of flow rates available in: 32 to 4000 LPM.
- Motor and controller ratings available in: 900 to 54000 Watt

SOLAR PUMPING SYSTEM

IDENTIFICATION

DCSSP SERIES

Type designation

48 - DCSSP - 3000

Disc. (M³/ hr.)

Solar DC Submersible Pumpset

Input Power (Watts)

* Note: Input Power at Motor

The Solar high efficient pump-set comprises centrifugal pump technologies

The high Efficient Motor is designed according to the permanent magnet principle with separate electronics unit. The Motor speed range is 1000-3600 RPM depending on pump load.. The permanent magnet motor featuring a consistent higher efficiency within power range compared to a conventional asynchronous motor.

SOLAR PUMP CONTROLLER SPECIFICATION

OVERVIEW

The controller starts the pumps slowly and adjust its speed according to pumping load and power available from solar array.

Power output from the solar array is optimally matched to the load by maximum power point tracker(MPPT) throughout all conditions.

The Shakti Solar controller is designed with the high standard of reliability expected of Shakti products. The controller attempts to control the pump and motor to deliver water even under adverse conditions, reducing output as necessary to protect the system components from damage, and only shutting down in extreme cases.

CONTROLLER CODE	DESCRIPTION	INPUT POWER	VFD Voltage Range (Vdc)		VFD Maximum Current (Amp.)
			Min (V)	Max (V)	
9600000096	SIMHA UNIVERSAL DRIVE 3Ø 12 A	1 HP - 2 HP	30	425	12
9600000088	SIMHA UNIVERSAL DRIVE 3Ø 14A	3 HP - 5 HP	200	720	12
9600000094	SIMHA UNIVERSAL DRIVE 3Ø 20A	7.5 HP - 10 HP	200	720	20

9600000066	NANDI UNIVERSAL DRIVE 3Ø 38A	20 HP - 25 HP	200	850	38
9600000067	NANDI UNIVERSAL DRIVE 3Ø 50A	30 HP	200	850	50
9600000068	NANDI UNIVERSAL DRIVE 3Ø 70A	40 HP	200	720	60
9600000106	NANDI UNIVERSAL DRIVE 3Ø 120A	50 HP - 60 HP	200	720	120

DESCRIPTIONS AND FEATURES

The Shakti Solar controller continuously monitors system performance and incorporates a number of features for pump system protection. In the event of a fault, the Shakti Solar drives will indicate the type of fault through the displays.

The Shakti Solar drives system is optimized for pumping under adverse input power conditions unique to solar arrays.

- Internal diagnostics will tolerate a lower input voltage.
- Whenever possible, the controller attempts to regulate the pump load in a manner that optimizes for maximum power transfer from the solar array.

An easy to use interface is provided to enhance configurability and enable remote system monitoring.

- A three-digit seven-segment display provides a detailed indication of system status.
- A small keypad offers flexibility for selection of user options.
- A continuous data connection for remote telemetry is made available via an RS-485 port. (Optional)
- Controller can be Operated by mobile application.

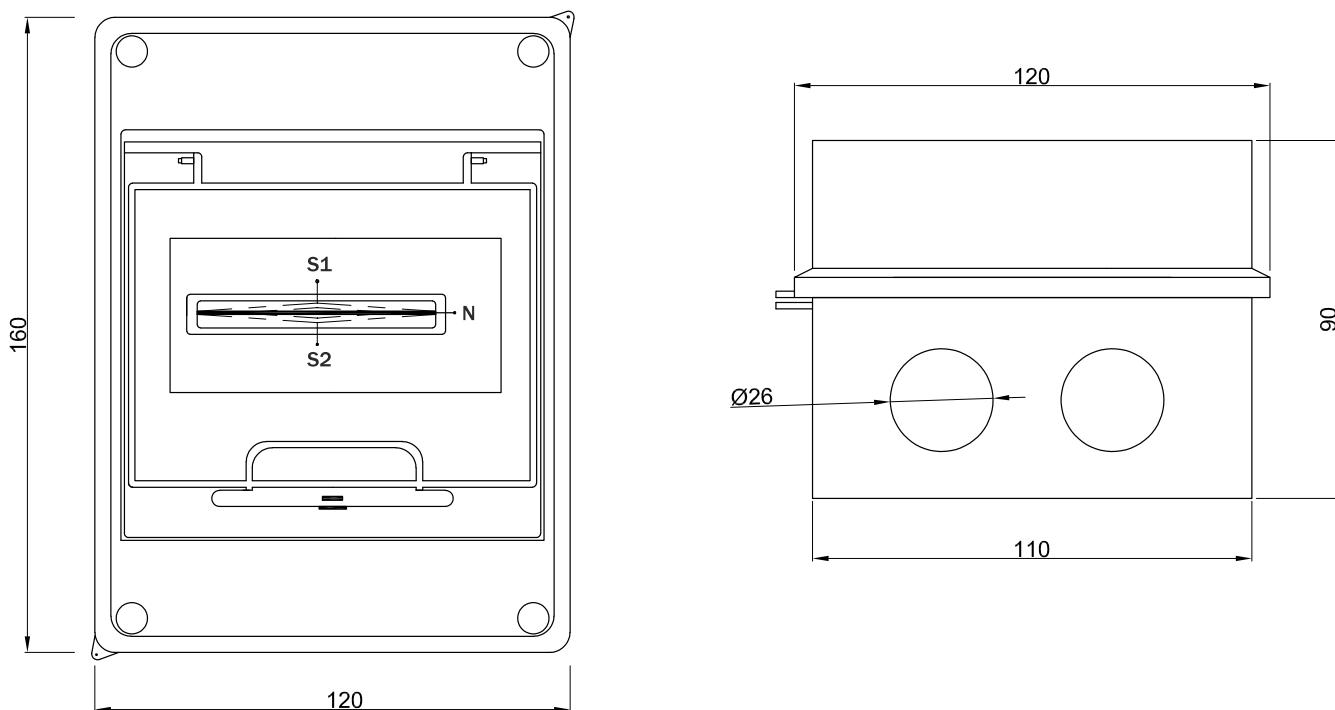

PROTECTION FEATURES

- Dry run Protection ➤ Overload Protection ➤ Open Circuit Protection
- Short Circuit Protection ➤ Over Heat ➤ Ingress protection IP65

CHANGE OVER SWITCH

A change-over switch is a dual input single output device, which is used to change the input power source to the controller. It is generally used with controllers/drives which have options to run from solar as well as from grid. There are three operative positions in change-over switch corresponding to S1, S2, (Up and Down) & N (Middle). In case of S1 and S2 positions the corresponding sources are connected to output whereas and in N position none of the sources are connected to output. Conventionally the name of the sources is marked in S1 and S2 position for convenience of the user. These change-over switches are provided in a dust and rainproof boxes.

Note: It should be noted that while changing the power source through changeover the N position should be used until the display of the controller turns off. This intermediate use of N position avoids inrush currents through the changeover switch & improves its life.

SHAKTI DU/DT FILTER

The applications involving long connecting cables (typically 100 m and above) between the VFD (Variable Frequency Drive) output and motor terminal, high voltage spikes are observed at receiving/motor end. The magnitude of these voltage spikes may go up to double the DC bus voltage of VFD depending on length of the cable. The high du/dt at the controller output is the primary reason for these voltage spikes. These high voltage spikes may lead to insulation failure in the connected motor or cable. This problem can be resolved using an appropriate du/dt filter at the output of the controller.

Conventionally used first order filter reduces this problem however; the second order Shakti du/dt filter mitigates this problem to a greater extent. It is a unique product which is designed, developed and manufactured by Shakti Pumps (India) Ltd. The IP54 design eliminates the requirement of outer casing and provides a fair protection against dust and water. This product comes with a wide variety of distinguished features such as: compact size, shock-proof plug and play connectors, capability to operate in wide temperature range and harsh environments.

APPLICATION

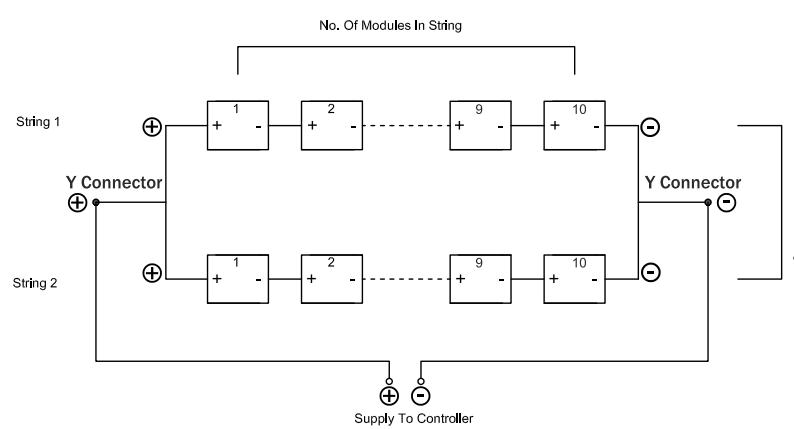

Reduces voltage spikes, common mode & bearing current.

SOLAR POWER SELECTION & CONFIGURATION

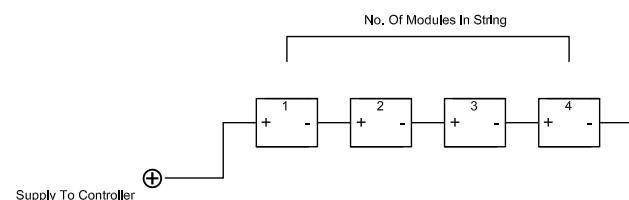

S. No.	Motor Input Power (W)		PV Module Wattage (W)	Total No. of Modules Required	Module Configuration		Structure Configuration (No. of Modules)
